THE FARM LOAN BOARD.

ESTABLISHMENT of the rural credit system, one of the most important of the constructive achievements of the present Democratic congress, has been completed by the president with the appointment of a farm loan board of four men to serve with the secretary of the treasury, every one of whom is bound to appeal to the whole country as a rightly wise selection. It would have been easy for the president to have chosen four men of larger political influence, men more prominent in finance, or whose names are more generally known to the people. But for sheer efficiency it is doubtful if four more satisfactory appointments could have been made. Each of the men named has been a student of rural credits and all the allied problems of farm financing. All of the four but Mr. Quirk have had long close-to-ground experience as practical farmers, and the able editor of Farm and Fireside through his long study and intimate knowledge of American farming conditions has had an experience more valuable to him in his present position than any amount of practical farming. Two of the four have held positions as banking executives in farming communities. Two had legislative experience and two are lawyers.

The Democratic congress not only has given this country a practical rural credit act, but the Democratic president has given the country an administrative board of practical men whose knowledge of the needs of the country is beyond dispute. The nomination of the farm loan board completes the accomplishment by Democrats of an important service to the nation which Republican statesmen and politicians have been discussing for twenty years.

Quite a number of patriotic New Mexico Republicans are evidencing a willingness to serve their party and the state in public office. But the general party staff shows no disposition to accept recruits. The old guard propose to retain all jobs available for Republicans and they are taking no chances in handling the nominations.

DISCOVERING SCENIC AMERICA.

THAT the Americans who have been spending \$100,000,000 a year on European tours have been paying a heavy premium for their scenic beauty and have been going an unnecessary distance to get it is the discovery made by the United States department of interior in its inventory of the wonder spots of this country. It is exposing the commercialization of our citizens in no uncertain terms and is preaching the sermon of home consumption of American scenery.

"This nation is richer in natural scenery of the first order than any other nation," declares Stephen T. Mather, assistant secretary to the secretary of the interior. "It possesses an empire of grandeur and beauty it has scarcely heard of."

The discovery of this grandeur and beauty by the motorists of this country is the sermon set forth by National Touring week, the automobile movement that has seized the nation from the Atlantic ocean to the Pacific. The impulse for a general outpouring of United States motorists to visit the natural beauty about them which followed the inception of the movement indicates that the country is primed for a widespread appreciation of the scenic wonder of our homeland.

When the sun rises on August 6, the date set for the official outing week of the motorists of this country, the greatest motoring tour this land has ever seen will be under way. Thousands of automobiles will be hitting the road on a vacation tour.

"See America first by seeing your own state first" is the sentiment nearest to the heart of this movement. Every state has its natural beauty, of which its citizens have a right to be proud. The reasoning of National Touring week enthusiasts is that you not only do not need to go across the ocean to enjoy scenic grandeur but you can find it almost within sight of your garage.

Vacation time in 1916 will be纪念 as the date of the real discovery of America.

It is rumored that United States

Senator A. B. Fall of El Paso, Texas, will deliver the keynote speech as temporary chairman of the Republican state convention in Santa Fe on August 22. This may be good news. An outsider with no local interests often makes a useful referee in an ever-going fight.

ALASKA AS A PRODUCER.

A LASKA'S sales to the United States in the fiscal year 1916 aggregated nearly \$10,000,000, a sum double the annual average since 1912 and only exceeded by those of ten countries when measured by their sales to us in the last year prior to the great war. In addition to this Alaska shipped to us in 1915-16 gold valued at \$16,000,000 and silver to the value of \$16,000, both from its own mines.

The predominant feature of the year's trade, according to an analysis made by the bureau of foreign and domestic commerce, department of commerce, was the rise of copper to first place among Alaska's export staples, thereby supplanting salmon and gold as the leading items. Exports of copper in ore, mats and ingots from Alaska aggregated \$12 million dollars valued at \$6 million dollars. This is four times the average for the preceding three years and exceeds the combined imports of that class from Chile, Costa Rica and Mexico, the leading foreign sources of the metal.

Canned salmon shipped to the United States in the last fiscal year amounted to \$14 million pounds valued at \$8.15 million dollars, an increase of 24 million pounds over 1915 and of 40 million over 1914.

The shipment of \$16,000,000 worth of Alaskan gold to domestic ports was larger by \$1,000,000 than the total for 1915 and by \$1,000,000 than that for 1914. Silver shipments, valued at \$16,000,000 in 1915, were \$16,000,000 more than in 1915 and \$800,000 more than in 1914.

Acting upon a suggestion of the Chamber of Commerce, the Trinidad city council has volunteered to bear all expense of establishing a central market place in that city for the use of the people and of farmers in the surrounding district.

Drainage for the Albuquerque valley cannot be accomplished by spasmodic speech making. The end of another summer is drawing near and it begins to appear that we are nearer to a definite, practical drainage movement for this valley than on the memorable occasion when certain adventurous Spanish gentlemen discovered it.

Extension Workers

Consider Livestock Methods at Meeting

If the leases of half a million acres of state land discover oil New Mexico will have gained enormously. If the fail to discover oil after carrying out the extensive prospecting program called for in their contract, the state still will gain; because a lot of New Mexicans who otherwise would spend their money prospecting will save it or use it in some other form of exploration.

THE PEOPLE WAKE UP.

RECENTLY a prominent Texas business man complained bitterly because he believed the American people were taking more interest in baseball than in the pending railroad wage controversy, which he showed threatens national disaster. This may have been true when the comment was made, but it is true no longer. A reading of the newspapers of the United States from coast to coast will show that newspapers and the public have woken up to a realization that there is about to be played in the hands of half a dozen men, the heads of the four railroad brotherhoods, power to decide industrial warfare in this nation, to cause arbitration and to partake, or attempt to paralyze, the whole business and industrial life of the nation.

The public has woken up to the fact that the railroads, pleading their inability to afford the wage increase of a hundred million dollars a year, in view without raising freight rates, have proposed arbitration by the interstate commerce commission, the one existing federal tribunal qualified in all ways to arbitrate such an instantly and justly to all parties concerned, including the people of the United States who in the first and last analysis of such a conflict must bear the bill, and that the heads of the railroad unions not only have refuse the arbitration proposed, but are even all the power of their positions and their highly efficient organizations to secure a vote in favor of a strike, which will give over to them power to determine peace and prosperity, or industrial warfare and commercial ruin in this country.

The people, all the people, great and small, rich and poor, will suffer if this issue fails of arbitration and comes to blows. The people of the United States are not disposed to endure much unnecessary suffering just now. They will not stand for an unreasonable attitude on the part of 15 per cent of the railroad employees of the country any more than they will stand for an unreasonable position on the part of the railway management.

Hog Shipments Continue.

Dexter N. M., July 28.—Hog shipments from the Pecos valley to the Kansas City markets are continuing. C. P. Shearman has sent another carload of fat hogs to this market shipping from here.

Plan Amusement Park For Guards.

Deming, N. M., July 28.—An amusement park for the benefit of eastern guardmen soon to be encamped here is planned by Dr. M. Pryor and Phil Estes, who have leased a ten-acre site near town and will put in practically a continuous wild west show.

BAKER NAMES COURT TO TRY GUARDSMEN WHO REFUSE MUSTER

Four Regular and Nine National Guard Officers Compose Tribunal That Will Hear Case of New Mexicans.

By Evening Herald Leased Wire Washington, July 28.—Secretary Baker made public today the personnel of a general court martial to meet in Alamogordo, N. M., August 7, for the trial of members of the New Mexico national guard who refused to be mustered into the service of the United States when the state troops of New Mexico, Texas and Arizona were called out for border duty on May 8 by President Wilson.

Four officers of the regular army and nine officers of the New Mexico guard compose the court, over which Major George E. Strode, Twelfth cavalry, will preside. A similar court was ordered to try cases of the same kind among the Texas guardsmen some weeks ago, but no trials have begun, as defendants who were apprehended preferred to have the matter carried over until the beginning of court-martial proceedings.

SOLE CASE TO BE TRIED THAT OF COMPANY K MAN. Columbus, N. M., July 28.—Lucas Gardner, a member of Company K, First Infantry, New Mexico national guard, is being held in custody by military authorities here. It is alleged that Gardner refused to take the oath that would muster him into the service of the United States when the troops were called for border duty by President Wilson. Military authorities here asserted that so far as is known this will be the only case of its kind to be tried before the general court-martial called to meet here August 7.

Aeroplane Gets Out of Control, Overturns Four Autos; Kills Boy

By Evening Herald Leased Wire Columbus, Ga., July 28.—Second Lieutenant S. H. Wheeler of the army aviation school at North Island, lost control of his aeroplane here today and crashed into a line of automobiles, overturning four, killing Harold Stoate, 14 years old, and seriously injuring Miss Anna A. Stoate, the boy's mother. Lieutenant Wheeler was not injured although his machine was wrecked.

Extension Workers Consider Livestock Methods at Meeting

By Evening Herald Leased Wire Fort Collins, Colo., July 28.—A demonstration and discussion of methods of supporting extension schools received attention at the Tri-State Summer Conference for Extension Workers here today. Today sessions were led by A. L. Holman, director of extension work in Wyoming.

The Relation of Extension Schools to Extension Schools and Institutes" was discussed by Leon A. E. Burnett of Nebraska, Director H. T. French of Colorado, and of the work of planning, promoting and conducting an extension school.

The importance of local support, developing local instruction and the limitations of corps were subjects presented by Stanley V. Smith, G. McLeod and H. B. Simpson of Colorado.

The livestock demonstration in the afternoon was preceded by a discussion of "The Importance of the Extension Service to the Livestock Industry" by S. E. Barnes of Wyoming.

Tonight Prof. W. J. Morrell was to speak on "Tree Planting for Colorado."

GONE FOR GOOD.

Results That Last Are What Appeal to Albuquerque People.

Kidney sufferers in Albuquerque want more than temporary relief. These word results that Prof. Dr. Soule says Mrs. Fournelle tells about:

Here was a thorough test. Nine years is a long time.

Dr. Soule's kidney pills have stood the test and stand it well.

Why experiment with an untried medicine?

People here in Albuquerque have shown the way.

Prof. Dr. Soule's story:

Mr. J. Fournelle, 41, South Broad way, Albuquerque, says: "Three boxes of Dr. Soule's kidney pills cured me of pain in my back that had troubled me for many years. I was also relieved of rheumatic pains."

(Statement given January 26, 1912.)

On May 26, 1913, Mrs. Fournelle said: "Dr. Soule's kidney pills have cured me and I have had no occasion to use them since giving my former endorsement."

Price like at all dealers. Don't simply ask for a kidney remedy—get Dr. Soule's kidney pills—the same that Mrs. Fournelle has twice publicly recommended. Foster-Milburn Co., Provo, Buffalo, N. Y.

Hog Shipments Continue.

Dexter N. M., July 28.—Hog shipments from the Pecos valley to the Kansas City markets are continuing. C. P. Shearman has sent another carload of fat hogs to this market shipping from here.

Plan Amusement Park For Guards.

Deming, N. M., July 28.—An amusement park for the benefit of eastern guardmen soon to be encamped here is planned by Dr. M. Pryor and Phil Estes, who have leased a ten-acre site near town and will put in practically a continuous wild west show.
